

Rozanna Patane  
York Harbor  
LD 1321

I'm writing today to OPPOSE LD1321 and ask the Committee to leave Net Energy Billing intact. I recently purchased a share of a solar farm, in part for the benefits of NEB to reduce my electric bills while helping the state increase this reliable, clean source of power. As a moderate-income retired person, I appreciated the additional financial security this purchase promised, but of course it depends on NEB continuing unchanged. This bill would cut in half its benefits and it would increase the state's dependence on fossil fuels -- a foolish change that takes us backwards. PLEASE DEFEAT LD 1321.

Sincerely,  
Rozanna Patane
