LD 1062

Hello. I would like to recommend "ought to pass" for LD 1062. I feel this is an infringement on my right to free commerce and private sales.

It is also unenforceable as i found out the other day. Who is even watching this? I feel like the cyber crimes units have better things to be watching for than private sales.

A co worker didnt even know this was a law and told me about a purchse he recently made that, according to him, makes him a criminal unknowingly. This opens up the prospect of others to be arrested and have their property consficated by police. And they wont even know why.

And finally, most responsible sellers already go to an ffl to finalize their sale. They do not want to provide a prohibited person with a weapon. Nor do they want to have their gun invlved in a crime even after it has left their ownership. Thus, this really is unnecessary. Especially since most criminal just simply steal their guns from law abiding citizens
