To Comittee Members,

This Bill LD 1507 makes a great deal of sense to me. In the past year i've learned some about Tank Emissions but I choose not to cloud this letter with any of it except the most important part that most directly applies to this bill.

Although there's different types of air pollution from the Tank farms, Benzene Is the one that turns this bill at into a "must have" to protect the innocent bystander, the tank farm neighbors.

The equation is simple. You can't smell or see Benzene levels that are a danger to you. The only way to protect folks living next to the tanks is by warning them that danger is coming which this bill addresses.

The only way to do this is by passing this bill. This way, when people get the warning letting them know about this invisible orderless danger coming, they can then choose to close the windows or pack up the car and go visit a relative, etc.. Please help those folks to be able to protect themselves and their families.

Regards, Dave Hebert
