**LD 1373 An Act to Withdraw from the National Popular Vote Compact**

Senator Hickman, Representative Supica, and Committee and members of The Veterans and Legal Affairs Committee, I am writing on behalf of myself and my husband; we are long time Maine residents. We urge you to support LD 1373.

Adopting the NPVIC would serve to dramatically reduce the role of states in presidential elections. Not only would the NPVIC deliver your state's electoral votes to the national popular vote winner even if the majority of voters in your state voted for a different candidate, but a very large number of states (likely a majority) would have the whole presidential election process, known as the Electoral College (as provided in Article II of the Constitution), transformed without their consent and without their participation in a constitutional amendment process.

Now imagine this, if the present law that put Maine into the NPVC had been in effect during the last Presidential election the 3 Electoral College votes that were given to Kamala Harris would have been given to Donald Trump. He would have won by even more Electoral College votes!

Additionally, the Electoral College caps the influence of the large population states and therefore helps prevent the tyranny of the majority problem. The Electoral College helps prevent voter fraud from changing who wins presidential elections.

We urge a strong ought to pass on LD 1373.

**Respectfully submitted**
