Background checks save lives. See below, with footnotes/documentation.

- LD 1062 would allow unlicensed sellers—people who sell guns online, at gun shows, or anywhere else without a federal dealer’s license—to transfer firearms without confirming that they are legally allowed to possess firearms.
- Because of this loophole, people who are subject to domestic violence convictions or court orders, people who have been convicted of violent crimes, and people ineligible to possess firearms for mental health reasons can easily buy guns from unlicensed sellers with no background check.

Key Statistics:

- An estimated 22% of US gun owners acquired their most recent firearm without a background check. (1)
- A recent large-scale survey found that 45% of gun owners who acquired a gun online in the past two years did so without any background check. (2)
- Around 80% of all firearms acquired for criminal purposes are obtained through transfers from unlicensed sellers who are not required to perform background checks (3)
- In at least 90% of cases, background checks are resolved almost immediately, often within just a few minutes. (4)
- Contrary to gun-lobby claims, background checks rarely provide false-positive results. The FBI’s data suggests that background checks are accurate approximately 99.3 to 99.8% of the time. (5)
