

Sally Pachulski
Scarborough
LD 1423

I'm a Mainer who has lived in many spots across the country but thankfully I'm back in Maine. The plastic pollution across the country is a visible blight on the landscape, a hazard to wildlife and a threat to human health as microplastics leaching into the soil to be taken up by plants and animals in our food supply find a home in our bodies.

Alternative packaging is available and corporations need to contribute to support our recycling efforts.

I do NOT support LD 1423.
