Portland
LD 339

I am writing in support of LD 339, providing the funds in order to develop a high school level Wabanaki-centered Curriculum. It is important to me, as a Maine educator and community member, that we continue to adequately compensate Indigenous people for their expertise and continue to prioritize teaching robust, accurate and meaningful curriculum. I would advocate that we provide additional funding. Curriculum development such as this is compensated much higher in the industry (often at least \$300 per student per year), we should seek to go beyond the standard for such a specialized curriculum. Please support this bill.
Thank you,
