

Margaret Bradley  
Belgrade  
LD 1550

I am a Belgrade resident and represent 4 generations on the lakes here. Having inherited an old camp with a failed septic system I can personally attest how critical it is that this bill pass (yes...we fixed it...but does everyone?) PLEASE consider us all...year-rounders and visitors alike. Protecting our waters now, will save us all money in the long run. Being proactive is MUCH less costly than having to be reactive once the damage has escalated to critical levels (In our area, our lakes are already designated impaired by the DEP) I hope we do everything we can to educate everyone and put protective measures in place, Like LD1550, that will address necessary changes to be made to protect these fragile resources. THANK YOU!
