

Meg Rogers
Cape Elizabeth
LD 1423

Hello,

Thank you for taking the time to read my testimony. I am writing to share my opposition to LD1423. As our planet continues to degrade from human use, actions & behavior it is imperative that we each do what we can, including companies who profit off of our behaviors. As someone who has been striving to live a low waste lifestyle since 2017, I can attest that it is challenging, expensive and frankly not always possible to do the “right” thing. Sharing responsibility for the end of life of products would make a huge impact. It is all of our collective actions, both individually and organizationally, that are critical and matter. I urge you to vote no on LD1423. Let’s maintain the momentum of Maine setting this important precedent of EPR for our nation and be the example.
