LD 1423

Dear Committee Senators and Representatives,

I am writing in strong opposition to LD 1423. Enactment of The Extended Producer Responsibility Law is paramount. We can no longer weaken our laws by creating loopholes and exemptions that allow continuing waste to be peppered on our environment because the producer wants to spend less money or effort. The EPR law has been through an arduous and comprehensive process and years of collaborative work. Responsibility for waste must be in the hands of the producers as they design packaging and delivery to align with a sustainable future. This beautiful natural world that we live in, is in your hands and I encourage you to lead the way for strong protection. I strongly urge you to OPPOSE LD 1423.
