

The Honorable senator carney

4/22/25

My name is Derek Campbell of
warren maine. I write to you to express my
strong support for LD648, an act to expand
the supervised ~~release~~ community confinement
Program in maine I've done 5 prison
sentences now, I think if I was able to
do this program it would have helped me
re entering society. Its like a halfway thing,
I would have still been able to be close to
my family and children who also get hurt
by us inmates being locked away from them.
Also it would give inmates something to
look forward too, and help them want a change.
Like all 4 of my children always cry for
me to come home. This program would
give us a second chance to be with our
families. There's days I sit in my cell and
cry and wish there was a program like this
so I could be home with my family, and
not be stuck here my whole sentence. People
lose homes and loved ones being stuck

in prison for long sentences. If this program
could be available for more inmates, I +
would give inmates a way to keep those things
I've lost everything I owned, and good
relationships with family and children. I'm telling
you my story just so you will know some
things it would help so please vote
Ought to pass
