Hello committee members.

This will be a No from me and many others. This is a clear path leading to spying on the citizens. This is to violate people's choices on own property. We do NOT need more LAWS to govern what home rule already does...towns already require permits for upgrades to electrical. Stop being this overreaching overbearing person.

Let me guess next you'll want to monitor everyone's wells or public water usage, are you going to track how much soil a citizen purchases/uses? Etc. see where this can go? This is a slippery slope and I don't think you would want your name on something that will infringe on people's privacy. This is blatantly clear this is retaliation against the people because others can't control the "triad" weed. Stop going after the cannabis and go after the other illegal acts and person doing it. For instance tax invasion, exporting, pesticide spraying, human trafficking, money laundering to name a few.

Something to think about and consider.

How far is too far when it comes to spying on your constituents?

Thank you for your time.
