I would like to see a YES vote to advance this bill. Ranked choice voting safeguards the individual voice in our election process by ensuring voters can feel safe to vote for who they want rather than voting defensively, to avoid who they don't want. Despite narratives from opposition, the concept is not confusing unless purposefully made so. I am in the 2nd District and I feel that the narrow wins by Golden there highlight how necessary Ranked Choice Voting is, not because he was the winner, but because it makes it very clear that each and every vote matters. Ranked Choice Voting methodology will insulate our state government from outside influence and extremism.
