Good afternoon, I believe ranked choice voting makes sense for maine. This system allows us to vote our conscious and get out of the Neverending loop of voting for the best worst candidate. It has worked very well for the state so far, it makes sense to expand it to these voting categories. With rank choice voting we feel confident that no one who gets less than 50% gets the most important job of forming our ideals. As a society I think we owe it to our people to say no to the two party system and this is the first step. Vote your conscious, please vote for ranked choice voting for us
