

Kimberly Hallee
Waterville
LD 1763

Please Support LD 1763 and regulate non-water dependant floating structures. We volunteer hours of our time providing LakeSmart Evaluation and Secchi disc readings to help keep our lakes healthy. We teach best management practices to lakefront property owners in methods to keep phosphorus/dirt from entering the water thus limiting algae growth. Secchi disc results indicate water clarity which is an indicator of lake health. Unregulated "house boats" may dump feces and other human waste overboard. More "floaters " in the water spells E. Coli and a host of infection and pollution to follow! Mooring in the shallows spells added shade and heat killing natural plant and aquatic life. Rafting of multiple "barges" will cause waterway congestion,impede boating and fishing pleasure and create safety concerns that already over worked and underfunded I,F & W - Game Wardens will be hard pressed to address. Sensible- law, common sense must prevail please vote Ought to Pass LD 1763- Regulate NWDFS. Thank you Kimberly and David Hallee, McGrath Pond Oakland.
