LD 1349

Dear Environment and Natural Resources Committee Members,

Please pass LD 1349 which will require legislative approval before extending the operating service agreement for Juniper Ridge Landfill. A critical step needed to protect the environment and our health.

As Maine grapples with the PFAS emergency affecting farmlands, forests, waters, and even hunting it is critical we take the necessary steps to protect the land, water, and inhabitants from this dangerous chemical.

If passed LD 1349 will enable greater transparency, democratic oversight, and environmental protection.

Please pass LD 1349.

Thank you,  
Mary Dunn
