I live on Lake Wassookeag in Dexter year round. Each winter I see long term and pop-up ice houses brought on the lake and then removed. The remaining trash and other messes that people make after long hours on the ice can be disgusting. Even if the messes were accidental from wind, or no bathrooms, we need to protect our lakes and not invite more ways for people to trash them. Please vote to prevent nonwater-dependent floating structures on our precious lakes.
