LD 1684

My name is Amber Jordan. I 100% support bill LD 1684. Sept 23rd my best friend of 27 years posted on my facebook ; love you so much and wouldnt wanna live this life without you. Two days later she was murdered. She met Richard Keith Thorpe in April. I googled him to look up any information and besides small info here or there, there was nothing about his abusive deadly past anywhere. It didnt take him long to show her true colors. She did everything right. Broke up with him, left him like everyone begs abuse victims to do. My niece and I set up daily check ins. I didnt get one September 24th. I woke up September 25th and found out he had strangled her to death in the middle of the night. He took the time to block me on facebook.

If this bill was set in place then, she would have never met him, she'd be still alive right now. She would be spending so much time with her daughter Karmyn, with her nephew Logan, seeing her niece Kylie graduate. We would be going on road trips, watching horror movies. We would be going out on our girls dates watching horror movies and working on our tattoo sleeves we started together, we would be going to different restaurants and having margaritas and cheese fries. He stole her away from us and we all suffer from her loss daily.

Please make these people more accountable for their actions and make sure they fully pay for hurting other people. i will miss her for the rest of my life because he took her out of my life,
