

Nan Lee
North Haven
LD 1231

My husband and I are each 80 years old and we live on North Haven Island. We have had a health emergency where we absolutely depended on the ferry to get my husband to the mainland and to PenBay hospital.

My husband had a pulmonary thrombosis that required immediate hospitalization. Without the ferry, he would probably be dead.

A few weeks ago, there were two emergencies on the island within ten minutes of each other. The ferry, docked here, was essential.

Please make sure that the ferry remains docked here overnight.
