An Act to Clarify Overnight Docking at Mainland Ports for Certain Island Ferry Vessels

As an Islesboro Island resident I have experienced the importance of the ferry for transport to the mainland for work, groceries, appointments and school. The ferry also provides an important emergency service day and night for transport of the island ambulance to local hospitals. When the ferry is not available the Islesboro Emergency Medical Service must rely on local fisherman and taxi service to transport patients. Access for loading patients to these boats can be hazardous in bad weather and extreme low tides as the ramps are narrow and steep. Support the continuation of the overnight docking of the ferry through these bills.
