Dear committee,

I recommend that this bill out not to pass. I am a middle school principal with over 500 students in our school and decades of experience. I am an advocate for all students, including students who want to experience a safe school day. This places schools at risk of dangerous students returning to school with no time for the school's preparation. Please consider that students who have an abbreviated day have many protections, which includes the IEP process. My recommendation is that this bill out not to pass.

Many thanks!
