LD1382- An Act Regarding Dam Repair

I support passing of this bill.

I believe it would be a significant impact to the communities on Toddy Pond if the Dam was disabled and the pond were to be drained. The Environmental impact would also be significant as it would impact the Migratory wildlife that depends on this specific body of water. The impact to property values of hundreds of lakefront property owners would also be significant. The seasonal spending, brought to the area to support the economy in the area depends on the lake activities.
