This bill should not pass! Citizens need to be involved in the school budget process. School budgets are the largest part of any municipal budget and has the largest impact on our community and our wallets. When school budgets rise unnecessarily our taxes go up. That is straight forward. If education monies are being directed in a way that does not support educating children the community needs to be a check and balance. Yes, voting for school board members is a check and balance, but it is the the flow of dollars that really count. I urge you to defeat this bill and let the citizens be heard.
