I was born and raised in this country. I was born and raised in Maine. My criticism of Israel is not antisemitic. That is a low effort, low IQ excuse to stifle my free speech. It's not happening. I don't care what corrupt, insane laws are passed. My Constitutional rights supersede any laws, ordinances, policy, bans, or rules, written against it. Period.

I will remind you all that Palestinians are semitic. How are we writing laws, when we don't even know what words mean? There are several online dictionaries, if you don't have any on your bookshelf.

I will also remind you all that despite what the main stream media reports, or doesn't report, the people have access to all of the information and that information will be spread.

For Ex: The Israeli's have admitted that they attacked their own people, on Oct. 7. We have heard this from released hostages. We have heard this from eye witnesses. IDF soldiers have openly admitted this and described the incidents, in detail. Yoav Gallant admitted it, on National Israeli news. This is called the "Hannibal Directive".

The IDF also shot and killed 3 of their own hostages. These hostages were waving a white flag and begging the IDF for help. They were speaking Hebrew. They were shirtless.

Multiple appalling attacks on emergency services. Hind Rajab was 6 years old. She was in a car, with her family, when the IDF opened fire on them. Hind sat, for 3 hours, in a car with her dead family. She called emergency services. The Red Crescent was given the green light to rescue her. When they arrived, the IDF killed the crew and Hind.

The IDF was also, recently, exposed for executing another emergency crew and burying their bodies. They were caught, red handed, and their lies were exposed, only because one of the medics recorded the incident, before his death

This is just a pebble, compared to the mountain of evidence, against the terrorist state of Israel. Targeted attacks and assassinations, of journalists, medics, aid workers and UNARMED CIVILIANS! CHILDREN! I could lecture on the topic, for hours. All of the things that our media and government try to hide, will be spread amongst the people. Violations of our Constitutional rights will not be tolerated. Period.
