Portland  
LD 1138

Please support LD 1138. Mainers, especially disabled, elderly and low-income Mainers, need access to more clean, safe, and affordable transportation options in the state. These transportation services keep people healthier by expanding their access to medical services, food choices, and free or inexpensive outdoor recreation areas. Offering a variety of accessible transportation options also makes Maine more appealing to an increasingly selective workforce that Maine needs to continue attracting. I urge you to support LD 1138.
