

Marguerite Williams
Penobscot
LD 1138

I urge the Transportation Committee to pass this bill LD1138 and support all State efforts to reduce our greenhouse emissions and promote clean air quality for Maine citizens. CLIMATE CHANGE IS REAL! This should be a non-partisan issue as the heating of our state and planet is affecting us all and will only get worse for our children. Transportation is our highest area for emissions and one we can control through this good legislation.

PLease vote to PASS LD 1138!

Respectfully,
Marguerite Williams
