LD 1138

An Act to Reduce Pollution Associated with Transportation in Alignment with the  
State's Climate Action Plan  
Testimony in Favor of Ought to Pass

Senator Nangle, Representative Crafts and member of the Transportation Committee,  
Mostly you know me as an advocate for active transportation. One reason for my  
support of active transportation and this bill? Both help to mitigate future negative  
environmental impacts of vehicular transportation, facilities and their creation.

This bill goes straight to the heart of reaching Maine's climate goals. If you have a  
goal, but no plan for how to get there, it is dead certain that you won't reach the goal.  
This bill is a plan to reach Maine's climate goals.

For this simple reason, I urge you to vote Ought To Pass LD 1138.

Thank you for all that you do in service to Maine and its citizens.
