IN SUPPORT OF LD 1138

To the distinguished members of the Transportation committee:

My name is Aidan Sites, I am a resident of Leeds Maine. I grew up in Augusta Maine (right up the street from the state house in fact) and graduated from Colby College in Waterville. I am a Mainer by anyone's count, and proud of it. Yet there is a massive problem in the way that Maine conducts our society, particularly in our transportation system. Maine's transportation system is the largest polluter of our state, and yet we do very little to mitigate the problem in our state's climate action approach. By introducing simple yet effective solutions, such as more accessible public transportation, more bike lanes in urban areas, and investments in infrastructure that support a transportation transition -- we have the opportunity as a state to make some real changes in the way we conduct our societies and protect our planet.

SUPPORT LD 1138, FOR PEOPLE AND FOR CLIMATE.

Thank you for your time and continued work towards improving Maine's transportation system, for us all.
