LD 1138

I am testifying in favor of LD 1138. We clearly need climate smart transportation planning which incorporates GHG reductions targets.

This bill will support expansion of cleaner public transportation throughout the state. I am 84 and near the end of my own driving, so public transportation will soon be a need.

LD 1138 addresses the issue of speeding up our planned GHG reductions in line with the revised Maine State Climate Plan's goals. Please vote for LD 1138
