

Paula Sutton
Warren
LD 890

Senator Haggan, and other esteemed members of the Health Coverage, Insurance and Financial Services Committee,

Please support LD 890, which makes it easier for certain patients to access ivermectin. I wholeheartedly support the concept of patient choice and ask you to do the same. Every individual deserves the right to try whichever medications they deem appropriate to their circumstances.

Additionally, I do not think this bill goes far enough . I believe it should be available OTC (over the counter), but , we have to start someplace and this bill is a step in the right direction . Thank you for listening and for your service to the Maine people.

The Honorable Paula G. Sutton
Warren, Maine
