

Cammy Moraros  
North Yarmouth  
LD 1637

MRRA is essentially conveying to the residents of Brunswick, local communities and the residents of Maine....."drink the Kool-Aid." MRRA's actions and in-actions show no concern for the health affects both short and long term for Maine residents, Maine's environment or the living creatures, plants and fauna. Brunswick residents deserve the right to speak for and advocate for their communities. Is it okay to knowingly poison anything or anybody and believe you can continue to line your pockets while failing to do the right thing? Unless MRRA is hiding something, they should be openly receptive to hearing from Brunswick residents, business owners, Environmental agencies and residents of Maine. Let's get some of these folks on MRRA's board.
