

Suzanne Johnson
Brunswick
LD 1786

As a resident of Brunswick, Maine with first hand experience with the AFFF release of toxic PFAS containing foam throughout my community I am writing with strong support for this bill and I urge its passage. Current communications from DEP regarding PFAS testing of homeowner wells is unnecessarily confusing and I believe misleading. The DEP is in the business of protecting the public and the environment and it should be their mission to provide information that is both accurate and protective of human health.
