

John Spencer  
Acton  
LD 1672

I support LD 1672. METRC tracking system is a monopoly over the RFID tags they exclusively sell and the companies using them are dependent on as result. METRC has been seen in many other states such as California not effective preventing illicit sales. Allowance of burner distros and apparent METRC complicity has been exposed through whistle blowers in recent months in addition to our own director currently being investigated for a conflict of interest also involving METRC. The list goes on. Please vote Ought NOT to Pass on LD1672/OPPOSE this bill. Thank you for your time and consideration.
