East Waterboro
LD 1847

I do not support LD1847. I believe the people of Maine and the hundred's of thousands of out of state patients deserve better legislation to better support the small businesses in Maine, not destroy them. Metrc is broken, current testing requirements for adult use are broken; both can be easily circumvented. Radiation machines are used daily to make adult use products "safe" and pass testing. Maine farmers need support from the legislature during this difficult economic time, not the opposite, do better.
