We love our home here and wish to do everything we can to preserve and protect what makes Maine so special!! Pollution is not only changing the climate, it is killing birds, fish, other wildlife and even us! Big Oil has long known that damage that it produces is a major cause of our failing climate, and some people's health!!!! Yet they continue to promote :

- disposable , one-time use plastics that end up in the ocean and kill fish and birds
- gas guzzling vehicles that pollute the air
- oil refineries that pollute the air making us sick and the burning of oil that is raising the temperature of the atmosphere
- pipelines that are old, leak, killing fish, sea grasses and vital marshes
- then expect tax breaks from the federal government.

It is time for us, YOU , to have the COURAGE to say NO MORE!! WE are worth protecting, our environment is worth protecting!! BIG OIL can afford to PAY for the damage they have done for so many, many years. Maine must, and can, lead the way in this effort.
