I am testifying in opposition to this bill because I love trans women, they are amazing, and they are women. It is literally in the name. I honestly have not read this bill because I do not have the time to take out of my day to read every single one of these bull**** bills you keep coming up with, but please try to take all of this hatred you have towards trans people and direct it elsewhere. Hate is exhausting. Trans people are not a threat towards female athletes. They just aren't. How about taking this energy and spending it improving our housing stock, increasing funds to support homeless people, and bolstering the public safety net if you actually care about supporting women in single-sex shelters? Thank you for taking the time to consider how you could be a little bit less heartless and closeminded.
