

Lily Cummings
Clinton, CT
LD 1847

Hello, my name is Lily Cummings and I'm an out of state resident who utilizes the Maine medical program. There's many reason why i prefer this program over my home state of Connecticut's program and we need to fight to continue to keep the market the way it is and help progress it into something other states don't see for the benefits of patients health and for the benefits of the caregivers who tirelessly work hard to provide medicine to people like me who struggle with mental health issues, but let's not forget the other qualifying conditions that may be more serious like terminal cancer. We all struggle, and we need our meds, and we deserve our meds. That's why I am writing to you in support of the bills being discussed today. With that being said, I think it's best to BLOCK the LD104 and LD1847. These bills will actively get in the way of helping people in getting their meds and getting clean meds. Here in CT we struggle with having safe clean meds and our medical products are tested. While in theory, mandatory testing does NOT mean that the products will be clean or actually pass. These implications are harmful for consumers health and trust within the medical program; which is KEY to having the best medical program in the country. Thank you for taking the time to discuss cannabis needs. I emphasize to BLOCK LD104 and LD1847. Thank you.
