

Daniel Paulino  
West Babylon  
LD 1847

Hey my name is Daniel and i also want to speak out against LD 1847. This bill is basically trying to turn the medical program into the recreational one, and that's not what patients or caregivers need. Tracking systems like METRC weren't built for small caregivers, they were made for large-scale businesses. If this passes, it's going to crush the people who've been holding the medical side down for years. Testing and tracking everything like it's a commercial product adds stress, costs, and complications for no good reason. Caregivers already have trust with their patients. Let them keep doing what they've been doing without turning this into a corporate mess.
