

Daniel Paulino
West Babylon
LD 1840

My name is Daniel and on the flip side, I fully support LD 1840. This feels like the kind of bill that actually helps protect the medical program instead of forcing it to change into something it's not. Caregivers are the backbone of Maine's medical scene. They should be supported, not regulated out of existence. This bill seems like it respects that. We need laws that help patients keep access to affordable, safe cannabis through the people they trust—not ones that make things harder. LD 1840 feels like a step in the right direction.
