As a long time physical education teacher (27 years), coach, and parent, I'd like to submit testimony to support prohibiting biological males from participating in female sports or using female facilities. Males and females are physically and hormonally different. Period. Always have been, always will be. They need to be encouraged and challenged where they are from birth. I have seen and fear the damaging affects that this brings to our youth both physically and emotionally from all sides. Thank you for your time.
