

Brandon DaRosa
Industry worker
LD 104

I am writing in opposition of LD 104. Please vote ought not to pass as there are several areas of concern in the language of this bill. Testing at every change of hands will lead to repeated testing within short timeframes of one another further inundating the limited testing locations that the 1600+ caregivers will need to work with. METRC has been seen in other states to be ineffective in preventing illicit sales and has created a monopoly over the RFID tags that can only be purchased through METRC and are required for compliance. Furthermore, the conflict of interest should be fully investigated between the director of the office of cannabis policy and METRC before any further money is spent on METRC contracts. Thank you for your time and please OPPOSE / Vote Ought Not To Pass on LD 104.
