New England's Finest Organics
LD 1847

Evening,

I am testifying against passing bill LD1847. This bill will destroy the medical community including my small business. I am a caregiver operating with one of the smaller licenses you can obtain. Simply put, I'm all for testing product to make sure patients are getting clean medicine. But, testing must be made affordable! As it currently stands I will not be able to pay for this proposed testing and still make money in essence shutting me down almost immediately. Please do not pass this bill. Thank you for your time.
