I would URGE the members of the committee to pass legislation which will ensure that females are safe in all areas and activities from PreK to 12th grade. It is time to stop the unfairness and the threat to the health and well-being of school-age girls and to demonstrate some common sense. We heard “follow the science” so many times during the pandemic. Well, follow the science now which affirms that boys cannot be girls and girls cannot be boys. No matter how a boy may choose to dress or how long his hair is, by his nature, he is more muscular than a girl. An individual is free to display many choices of clothing, appearance, deportment, but the biology does not change. Bring honesty and fairness back to our schools. Support girls now.
