This bill is great for maine medical and I'd like to include that your program that has been created in Maine is something that needs to be protected the nj medical program is sad and compared to Maine actually upsetting. The medical program in Maine helped me get access to medicine that would've bankrupted me in nj along with seeing the beauty of your state the food the sights the people your medical program should be a standard other states use to try to follow because when I found out how great it was I wanted to move there but unfortunately I can't. Upon hearing the state potentially wants to change this fantastic program made me write this hope it helps. Thank you Maine medical ! I hope it stays the way it is and continues to help countless people who need access to good clean medicine not funding financial holding corporations monetary gains because that's the only thing big cannabis companies care a out all the love and care about the plant amd the people goes out the window I live in nj there is 1 medical facility left in the state they're holding out but one of 2 of their locations has gone recreational and probably sooner then later it will be gone too. After breakwater medical is gone the only adult use stores offer all the same things an other store offers no difference! Nj medical patients can't get quality medicine in this state barely anymore. Any adult use store offers dry harsh over priced medicine that has harmful mold perhaps more then likely isn't helping anyone with their ailments. Long story short please keep and protect the Maine medical program the lives and well being of so many people depends on it and really makes your state stand out in a positive way compared to the vast majority along the east coast. Keep Maine medical program the #1 to offer. Thank you I sincerely hope someone hears this because I'm not the only one who thinks like this even if they didn't make it publicly known.
