I'm testifying against the passing of this bill. It will be a disaster to the businesses, employees, patients and communities which depend on the industry. This is an industry ending bill. Seed to sale tracking has proven to be a failure in most every state it was instituted in. It's not good for the growers or patients and there is always ways that untrustworthy people will find ways around the loopholes. Seed to sale does nothing but hinder the process of cannabis growing and makes something that should be medical become industrial. The constant over regulation of this plant needs to end.
