Defining males and females just on the basis of biological sex is narrow thinking. Transgender females may have been born as males but they have chosen to be defined by the gender that best allows them to be who they are.

Thinking that males are dressed up, as females to gain access to sports or facilities is horrendously outdated and confined thinking. Transgender is not a matter of dress. It is knowing that how they were born is not right.

We would be a society better off thinking that everyone does have the right to be who they are.

Vote against this cruel and dehumanizing act.

Thank you.
