Vote NO!!

As a healthcare provider who cares about my colleagues working courageously in the field of gender affirming healthcare, please protect them and those they treat by voting no. I have a transgender child. If Maine Family Planning were unable to safely provide her care, her risk of suicide will increase greatly. Please don't let that happen. Being transgender isn't a choice, it is a biological state that she would never have chosen. She has a right to safe and effective care provided by doctors and nurses who this bill would crush.
