

Julia Jerome
Eliot
LD 1847

My name is Julia Jerome, a resident of Eliot ME, and I am asking that you oppose LD 1847. As a medical patient who relies on higher dose edibles to treat my Ulcerative Colitis, a cap of 10mg per serving or 200mg per package would negatively affect my quality of life. This cap is unnecessary on the medical side of things where patients often require larger medicinal doses of cannabis, and buying more edibles would make the price to treat my disease inaccessible. Thank you for your time and please keep this in mind as I ask you to please vote to oppose LD 1847.
