

Daniel Malcolm
Brownfield
LD 1897

My name is Dan and I am a resident of Brownfield and I want to encourage outdoor cultivation of cannabis supported through the passage of LD1897. At this point in time, it doesn't take much intellectual fortitude to realize that any reduction of non renewable energy is paramount to the health of our atmosphere and organized life on this planet. The difference in energy consumption between plants grown under lights powered by a coal fired electrical grid versus plants grown under a star in the sky should not be over analyzed. The logic is intuitive and as simple as it sounds. Bill LD1897 encourages this simple, common sense, and can serve as an encouraging model.

Thank you
