

Alex Bordwick  
Greenwood  
LD 1847

Senator Hickman, Representative Supica & members of the Veterans & Legal Affairs Committee,

We are writing to express our strong opposition to LD1847. The dosage caps proposed in this bill would effectively deny patients access to the medicine they depend on, while dramatically increasing costs. At a minimum, its passage would have a devastating impact on Maine's medical cannabis program.

The current testing system is both unaffordable and unreliable. Mandating testing under these conditions, combined with the implementation of METRC, would be the fastest and most direct path to dismantling the medical program. This bill threatens the livelihood of countless caregivers, patients, small business owners, and working families across Maine.

As small business owners, we urge you to stand with us in protecting our patients, our businesses, and our community by voting against LD1847. Thank you for your time and consideration.
